## The New Generation of Swiss Cellular Skin-Care Cosmeceutics

For the first time a unique skin care line is enriched with:

### Active Stabilized Bio-Integral Cells

These biologically intact cells by virtue of their enzymatic activity maintain a remarkable amount of vital energy and constitute a natural reservoir of active biological nutritive elements.

These Active Cells are part of an effective protocol to **prevent** premature skin aging.

## The Ultimate Discovery in Rejuvenation Treatments

For the first time we can truly say that a cosmeceutical line applies the principle of “**active**” cellulotherapy, which is to induce the vitality of a young cell to an aging or deficient cell. The concept of “cellulotherapy” in itself is not new, but what Cellcosmet has been able to accomplish is to bring cellulotherapy to an active state, which has been instrumental in boosting the performance level by several folds.

## A New Anti-Aging Treatment UNIQUE IN THE WORLD!

### SPECTACULAR VISIBLE RESULTS !!

Before

After one clinical treatment

## Cellcosmet delivers high concentrations

As an indicator, the typical concentration level of active ingredients on the market ranges from 0,5% – 1,0%, Cellcosmet shatters those values by achieving concentrations of up to 30% for home care products and up to 44% for professional clinical care products.

## Cellcosmet follows your skin's biological age, sensitivity and your hormonal identity

You now have access to an arsenal of tools, which gives your esthetician the ability to personalize your prescription down to your skin type, age and hormonal identity. Cellcosmet has developed an elaborate line of products with varying concentrations and diversity of the cellular components to specifically meet your individual needs. Up to 8 different organic extracts are blended together to produce specific products for women and men (Cellmen) making this process unique in the world.
